

Join UUAA Realm—Our Online Community

We have a new information system! Realm will streamline our directory, giving, and communications platforms, allowing staff and volunteers to put more energy into programs and care.

What does Realm provide for me as a Member or Friend of UUAA?

When you enroll in Realm, you can

- edit your contact and family information, upload your own profile picture, and control who at UUAA has access to that information.
- access an online directory of UUAA Realm users.
- view your giving statements, make donation payments, and enter your pledges.

How is this different from the system we are replacing?

- Realm allows you to have UUAA information at your fingertips. Once you sign up, you can begin to explore! You will be able to check your profile information and request to join groups. Once you are signed up for your groups, you can view and communicate with others within your groups.
- Realm allows group leaders to add participants with just two clicks.
- Note: As Realm is being rolled out, current listservs are still functional and should continue to be used.

How secure is Realm?

Here's how ACS Technologies, the company behind Realm, describes it:

“We feel that the policies, practices and procedures we have in place to audit our security controls run parallel to that of SSAE 16. Security tests are performed annually by Secure State, who is based out of Atlanta, Georgia. They provide penetration testing, audits and consulting.”
