

Zoom... If you can't download the client application

If you have not been able to download the Zoom client application AND you are on a desktop (not mobile) computer, you can view using your browser.

1. Click the provided link for the Zoom meeting.
2. It tries to launch Zoom and asks you to open the app, but there's a link for "if nothing prompts from browser, click here to launch the meeting."

3. A new link appears below that: "If you cannot download or run the application, join from your browser."

4. Click that new link and Zoom should open the meeting without needing the app.
